

Transform old analog lines with VoIP – while keeping your existing carrier

CS4 Small Office Appliance

The CS4 is the ideal solution for small to medium businesses that want to take advantage of VoIP's benefits and still keep the option of using their existing phone lines. Calls can be terminated through the 4 FXO or PSTN lines while international calls can be sent through the Internet.

The CS4's System on Chip (SoC) design integrates all essential PBX functions on one chip, reducing hardware costs, power consumption, and administrative effort. The solid-state hardware minimizes the risk associated with hard disks and CPU fans. The system's standard NAND flash memory allows for large data storage. The CS4 also features an echo canceller and gain control on the PSTN side.

The system supports popular CPE PBX features. The audio jack supports music on hold input. The paging output connector allows you to use an existing overhead paging infrastructure. In the LAN, the system can also send RTP multicast traffic and use multicast-enabled devices for office audio paging.

Built-in 4 port FXO PSTN gateway

20 extension support

Paging and music on hold audio connectors

Full PBX features (see back)

Plug & Play and remote management

Integrates with Microsoft SIP-compatible products

Full security support (TLS/SRTP/HTTPS)

HTTP-based management and full OS access

Size: 8.25" × 6" × 1.75" inches

1 GB of built-in flash memory

Low power consumption: less than 7 watts

Fanless operation

Three editions to meet any company's needs

Call barge/listen/whisper modes			•
Call detail records			•
Call recording			•

* CS4 does not support call recording.

Office BASIC

Tailored for cost-conscious customers who don't need all the bells and whistles. Office BASIC is appropriate for small offices and residential applications. Includes essential features like voicemail, auto attendant, and hunt groups.

Office PRO

Geared for enterprise environments. In addition to Office BASIC features, Office PRO includes paging, conferencing, service flags, access lists, and Microsoft® Exchange 2007 UM integration.

Office PRO PLUS

Ideal for customers looking for call center features. In addition to all BASIC and PRO features, PRO PLUS includes agent groups, call recording of all calls, and listen-in, barge-in, and teach-mode functionality (coach an agent without the caller hearing).

Upgrading between versions is easy and requires the purchase of a new license key. All versions have multi-tenant capability and support the G.729 low bit rate codec for an additional charge. Licenses are based on extensions, making it easy to determine how many licenses are needed in an office.
