

# A communications system with security, scalability, and stability.

## Integrates with:

- SIP phones
- Telephone adaptors
- SIP gateways
- Internet telephony service providers
- Commercial off-the-shelf components

**pbxnsip's VoIP software for the Macintosh is the Apple of any Mac user's eye!** Finally, a software package that turns your Mac into a full-blown VoIP phone system. Get all the advanced features you'd expect, like auto attendants, hunt groups, conference server, agent groups, paging, calling card support, and much more.

Running a phone system on your MAC lets you reduce your monthly phone bills, provide remote phone support for telecommuters, and integrate your cell phone so that it rings when someone calls your office phone. Also, you can finally become part of what everyone's raving about—unified communications (one network for both data and voice). More advanced features like call recording, agent queues, call barge, listen in, and whisper are also available. The system integrates with all SIP-based hard and soft phones and interconnects with all the popular Internet telephony service providers.

# Three editions to meet any company's needs

Features	BASIC	PRO	PRO PLUS

Call detail records			•
Call recording			•

## Office BASIC

Tailored for cost-conscious customers who don't need all the bells and whistles. Office BASIC is appropriate for small offices and residential applications. Includes essential features like voicemail, auto attendant, and hunt groups.

## Office PRO

Geared for enterprise environments. In addition to Office BASIC features, Office PRO includes paging, conferencing, service flags, access lists, and Microsoft® Exchange 2007 UM integration.

## Office PRO PLUS

Ideal for customers looking for call center features. In addition to all BASIC and PRO features, PRO PLUS includes agent groups, call recording of all calls, and listen-in, barge-in, and teach-mode functionality (coach an agent without the caller hearing).

Upgrading between versions is easy and requires the purchase of a new license key. All versions have multi-tenant capability and support the G.729 low bit rate codec for an additional charge. Licenses are based on extensions, making it easy to determine how many licenses are needed in an office.
